

Product Intelligence Platform

Executive Business Analytics Report & KPI Analysis

Executive Summary

This performance report summarizes key commercial SaaS metrics and customer engagement insights derived from the Product Intelligence Platform. Metrics are calculated using our star schema warehouse, capturing over 120,000 billing transactions. Key dimensions evaluated include customer lifetime value (CLV), recurring run rates (MRR/ARR), churn rate coefficients, and cohort analysis.

Monthly Rec. Revenue	Annual Rec. Revenue	Active Paying Users	Avg Revenue Per User
\$686,030.30	\$8,232,363.60	9,707	\$70.67

Customer Segment Performance Metrics

Different client tiers (SMB, Mid-Market, Enterprise) display varying contract sizes, lifetime retention profiles, and overall predicted value. Enterprise customers present high individual value with low relative churn rates.

Segment	ARPU	Churn Rate (%)	Est. Lifetime Value (CLV)
SMB	\$38.75	40.40%	\$978.30
Mid-Market	\$111.89	19.06%	\$5,987.53
Enterprise	\$235.83	8.31%	\$20,045.59

Strategic Insights & Recommendations

- 1. Stabilize SMB Retention:** SMB accounts exhibit the highest monthly churn rate (~3.3%). Marketing and customer success should launch specific retention campaigns or incentivize migration to annual agreements.
- 2. Expand Enterprise Tier:** Enterprise clients, despite representing only 5% of the total base, provide extremely high Predictive CLV (~\$20,000) and exhibit very low churn (~0.8% monthly equivalent). Accelerate sales efforts to acquire enterprise logos.
